### **DETAILED ACTION**

## Response to Amendment

The response to the Notice of Non-Compliant Amendment (37 CFR 1.121) filed by Applicant's attorney on July 16, 2007 has been received. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 1-50 have been renumbered as claims 46-95.

### Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 46-54, drawn to a method for the preparation of a silyl alkyl ester.

Group II, claim(s) 55-78, drawn to a silyl alkyl ester.

Group III, claim(s) 79-84, drawn to a method for the preparation of a polysiloxane composition.

Application/Control Number: 10/518,060

Art Unit: 1709

Group IV, claim(s) 85, drawn to a polysiloxane composition.

Group V, claim(s) 86-95, drawn to a process of preparing a coated substrate.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical feature linking the claims is a compound of Formula (I). However, Baldwin et al. teach compounds of Formula (I) in the prior art (US 6,824,879, compounds 24 and 25 in Figure 1c, shown below). Therefore, the common technical feature linking the claims does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art. Accordingly, Groups I-V are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

$$O = O(CH_2)Si(OC_3H_7)_3 \qquad O = O(C_3H_6)Si(OCH_3)_3$$

9-anthracene carboxy-methyl 9-anthracene carboxy-propyl tripropoxysilane

24

trimethoxysilane

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- (1) where m is equal to 0,  $R_6$  is a hydrogen.
- (2) where m is equal to 1 through 4, R<sub>6</sub> is a halogen.

Art Unit: 1709

- (3) where m is equal to 1 through 4, R<sub>6</sub> is an alkyl or aryl group.
- (4) where m is equal to 1 through 4,  $R_6$  is a heteroaryl group.
- (5) where m is equal to 1 through 4, R<sub>6</sub> is a hydroxyl, alkoxy, or anylether group.
- (6) where m is equal to 1 through 4, R<sub>6</sub> is an unsubstituted amino group.
- (7) where m is equal to 1 through 4,  $R_6$  is a carboxy group, ester group, or amide group.
- (8) where m is equal to 1 through 4,  $R_6$  is a sulfonic acid, sulfonic ester, or sulfonyl group.
  - (9) where m is equal to 1 through 4, R<sub>6</sub> is a thio or thioether group.
  - (10) where m is equal to 1 through 4,  $R_6$  is a nitro group.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Application/Control Number: 10/518,060

Art Unit: 1709

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Loewe whose telephone number is (571) 270-3298. The examiner can normally be reached on Monday through Friday from 7:30 AM to 5:00 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Eashoo can be reached on (571) 272-1197. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/518,060
